

### Agri Road Independent Suspension

Discover the ARIS suspension, designed by ADR Group to provide machine performance and exceptional operator comfort.

Building on over 20 years of expertise in independent suspension design, the ARIS suspension combines ADR's proven performance and reliability with a new focus on reduced maintenance.

AGRI ROAD INDEPENDENT SUSPENSION

Moving innovation

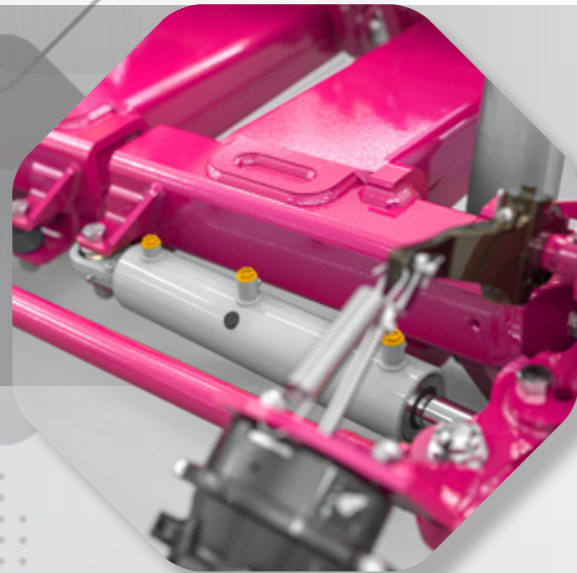

# ADVANTAGES

**Easy maintenance and durability.**  
Reduced maintenance and lubrication.

The cylinders are supported by lubrication-free silent-blocks. The cylinder pins are bolted for quick and easy disassembly. The articulation pins have special treatments to improve sliding and extend lubrication intervals.

**Possibility to implement the most common hydraulic steering systems:**  
Self-steering, hydraulic controlled steering, electronic steering with the same steering module (with Dual-Function cylinder).

The steering module can be equipped with a dedicated Dual-Function cylinder. It is compatible with all controlled and electronic steering systems.

**High performance:**  
High load capacity in all conditions.

**Top-category braking:**  
All the brakes ensure the best performances in their categories. All the brakes are EU homologated.

Equipped with Teknoax series hubs. Approved according to European directive EU 2015/68. Brakes 412E and 4218E.

**Great stability** of the machine in all situations, both on the road and off-road.

**Great capacity** to overcome high elevation differences.

Possibility to adopt very wide frame spacings, in line with what occurs for mechanical suspensions.
